Docker Troubleshooting

Network reachability

Docker Service not reachable from outside the docker host

- Check, if packets reach host
- Check, if container is reachable from docker-host
- Check ip-forwarding (sysctl net.ipv4.ip_forward)
- Check iptables NAT & access rules
- Check return route in container

Netshoot

Repository Image

Basic Usage

Start Container with Network Namespace of a running container

```
docker run -it --net container:<container_name> nicolaka/netshoot
```

Start Container with Host Network Namespace

```
docker run -it --net host nicolaka/netshoot
```

kb, linux, docker
