# JDownloader2 on Raspbian and FFmpeg Issue

To fix the "FFmpeg is missing" issue arising when downloading 1080p Videos from Youtube, firstly install libav-tools + dependencies

```
root@ef2085fe0fed:~# apt-get update; apt-get install libav-tools
```

and configure JDownloader 2 accordingly:

[kb](), [linux](), [raspbian](), [jdownloader](), [ffmpeg]()
