

# rsyslogd logs "action 'action nn' suspended"

Might be caused by nothing listening on /dev/xconsole - remediation: Comment out the relevant entries in /etc/rsyslogd.conf:

Change:

```
daemon.*;mail.*;\
    news.err;\
    *.*=debug;*.*=info;\
    *.*=notice;*.*=warn        | /dev/xconsole
```

To:

```
#daemon.*;mail.*;\
#    news.err;\
#    *.*=debug;*.*=info;\
#    *.*=notice;*.*=warn        | /dev/xconsole
```
